

ECO DOMESTIC HOT WATER

CERTIFIED PRODUCT
REFRIGERANT R513A

CERTIFIED

LATEST GENERATION OF SOLAR TECHNOLOGY. WORKS WITH SUN, WIND, RAIN OR

EFFICIENCY & QUALITY

IN DOMESTIC HOT WATER PRODUCTION

PORTUGUESE MANUFACTURING

- Stainless steel cylinder
- High level of efficiency and ecology
- Quiet operation
- Easy installation
- Smart photovoltaic function
- Anti-legionella function
- Optional coil
- Controller with software in 6 languages
- MCS Certification

THERMODYNAMIC SOLAR PANEL

- Anodized aluminium, with solocoat flexible finishing
- Easy to transport and install, only 8 kg and 2x0,8 m.
- No glass, rubber or fragile materials.
- No overheating and freezing problems
- It can be installed on the roof, wall, garden, etc.
- Panel efficiency does not decrease with age or dirt
- No need for cleaning and humidity resistance
- Estimated lifespan of 25 years
- Passed the corrosion test in a salt fog test equivalent to 20 years
- Solar Keymark Certification

SOLAR PERFORMANCE

Tested and certified according to the most rigorous European standards it has achived an extraordinary coefficient of performance of 3,9 according to the EN16147. The testing was carried out without solar irradiance, wind or rain. To enhance the real operating performance even more we advise to instal the thermodynamic solar pane facing South (North on the southern hemisphere), east or west. Vertically or horizontally on a wall, roof, flat roofbut always on a landscape position.

SOLID AND ROBUST

The thermodynamic solar panel is made of anodised aluminium with a special Solokote finishing that ensures it's robust and long-lasting against corrosion, in particular when exposed to saline and/or aggressive environments. This innovative technical feature allows energie to provide a 10 years warranty against corrosion, ensuring peace of mind to the end user.

SIMPLE AND ERGONOMIC

The high efficiency of the hot water cylinder is achieved by using a high-density polyurethane foam that ensures a low heat loss rate, being able to keep the water heated for several days in a row even if the units is turned off.

SOPHISTICATED

The equipment's indoor unit has a stainless steel or enamelled cylinder, as well as an external condenser. High density injected polyurethane insulation with cathodic protection. The thermodynamic block is equipped with a state-of-the-art compressor, with one of the lowest electrical consumptions on the market.

THERMODYNAMIC SOLAR SYSTEM

WORKING PRINCIPLE

The evaporation of the fluid that runs inside the closed looped circuit happens on the solar panel by capturing the heat from the sun, wind, rain and surrounding air by natural convection.

The heated fluid then travels to the compressor, that will compress the fluid increasing its pressure and also it's temperature.

Then it goes to the heat exchanger where where this heat is transferred to the water.

After this, an expansion valve will make the pressure and temperature drop to sub-zero values. The fluid travels up to the thermodynamic solar panel and the cycle repeats again.

- dissipate excess heat on hotter day
- Easy architectural integration, versatile without visual impact

ELECTRONIC CONTROLLER

DOMESTIC HOT WATER PRODUCTION

ECO Operating Mode

The equipment only works as a Thermodynamic Solar System.

AUTO Operating Mode

The equipment works as a Thermodynamic Solar System and/or electrical support should be required.

The equipment works with a Thermodynamic Solar System and electrical support simultaneously.

UP TO

PHOTOVOLTAIC INTELLIGENT FUNCTION

Take Full advantage of your PV System:

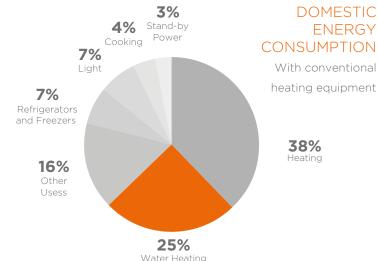

- Sets new standards of smart energy management
- Maximize your PV Solar Panels production and reduce your DHW costs
- Maximize the solar irradiation available by having the thermodynamic solar system working more when there is more sun available
- Get the balance between PV production and consumption with our intelligent controller
 With PV Smart Grid Ready, the ENERGIE Solar
 System absorbs the extra power generated by
 PV Panels, Wind Energy or Small Hydro storing, what would be lost energy, into the water, enabling you to save even more.

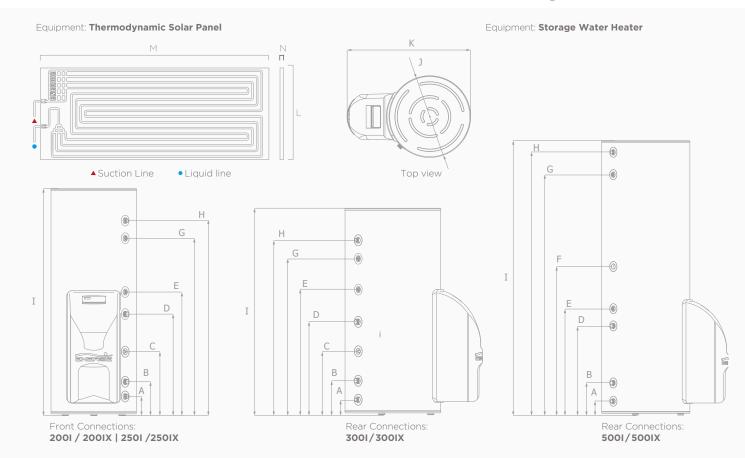

SAVING UP TO

85%

- Considering ECO250
- 7 hours of operation per day
- Consumption of 0.39 kW/h
- Required energy/month: 0.39 kW x 7h x 30 days = 81.9 kWh/month

ECO - 1 Panel
