6. Definitions

The new Aquapura THERMOBOX is part of Energie's ALL-IN-ONE equipment family, consisting of just 2 units, one interior, the THERMOBOX and one exterior, the Heat Pump.

100% hydraulic installation, all installation components are integrated in the interior of the equipment, making it a versatile and compact solution. Ideal for villas or multifamily dwellings.

NEW CLIMATE SOLUTION

All that is needed is to have a substructure of water terminals, namely radiators, invisible radiant heating or fan coils, to be able to enjoy this new solution for Heating & Cooling and Domestic Hot Water production.

MULTIFACETED RANGE

The THERMOBOX range has available several models developed considering all types of housing, namely single and multifamily constructions.

Models 160, 200 and 270 are the ideal solutions for various construction projects, meeting Heating & Cooling and Domestic Hot Water needs (DHW).

100% HYDRAULIC INSTALLATION

THERMOBOX stands out for its simple and easy installation process (Plug and Play), 100% hydraulic and without handling fluorinated gases.

ERGONOMIC AND COMPACT

THERMOBOX's interior unit was built with special regard for the space and area it takes inside the house, as well as the visual impact it causes. Allows for an easy integration, considering its reduced dimensions (60x60 cm).
